Profit & Loss Worksheet

Sophie works as a manager in a small bakery which has to make 50 loaves of bread every day for a market stall. The ingredients to make one loaf are shown.

To make one loaf :-
 500 g bag of flour
 2 teaspoons of salt
 2 teaspoons of sugar
 2 teaspoons of yeast

- Sophie can buy a 1 kg (1000 g) bag of flour at the supermarket, which costs £1.37. How many bags of flour will she need to buy?
 - How much does it cost to buy all the flour she will need?
- It might be cheaper for Sophie to buy her flour at the wholesaler "Cutscost" as they sell larger bags. A 12 kg (12 000 g) costs £10.45.

 - How many bags of flour would Sophie need to buy to make all the loaves?
 - How much would this amount of flour cost?
 - What problems might there be for Sophie in buying the flour in this way?
- What option is the cheaper way for Sophie to buy the flour that she needs?
- Sophie buys a tub of salt for £0.84, a bag of sugar for £1.49 and 3 tubs of yeast costing £1.28 each. Assuming that she bought the cheaper flour, how much did she spend in total on the ingredients?
- Another cost that Sophie has in order to make the bread is electricity. The cost of electricity is £0.13 per hour used and a daily service charge of £0.38. Sophie can bake 4 loaves at a time and it takes 30 mins for the loaves to bake.

 - How many hours of electricity will she use to bake the 50 loaves?
 - How much does it cost Sophie to bake the bread?

The Beach, the Bike, and a Chemical Change

Alexis and Javier have been in the same class since kindergarten. The children and their families have become great friends and often take summer vacations together. This year they decided to go to a beachside vacation. Alexis' Dad likes to spend time outdoors with the kids so he brought the family bikes along. It was a nice day and Alexis and Javier decided to take the bikes for a ride. As they were riding they thought it would be fun to ride their bikes into the ocean. "Wow," yelled Alexis as the salt water splashed in her face.

"Wow this is cool!" exclaimed Javier as he drove his bike into the ocean. It became hard to ride the bike in the wet sand, so they left the bikes and swam a while in the ocean. The ocean waves splashed on the bikes while they swam, but Alexis and Javier did not care. It was only water. It was almost lunch time now and the sun was getting hot so Alexis and Javier went back to the hotel to meet up with their families.

As soon as they got back, Alexis' sister started yelling. "Dad! Dad! Look what Alexis did. She got the bike all wet and dirty. How am I going to ride now?" Dad took one look at the bike and said, "We need to get those bikes cleaned off and dried as soon as possible."

"Why?" Alexis asked.

"Because the bikes will rust," Dad explained.

"What's rust?" Alexis and Javier both asked. Dad explained to them.

"Rust is when the water and the oxygen from the air react with the metal in the bike and turn it into a different substance. This new substance is rust colored and not as strong as the original metal in the bike. It will cause the bikes to eventually fall apart."

"Oh!" said Alexis. "Let's clean those bikes up now. I like my bike and don't want it to rust."

A few weeks later Alexis and Javier found themselves sitting in the same class again for third grade. Mrs. Smith, their new teacher, told the class that this year they would learn about

Coping Activities: Keeping a Journal

Writing in a journal can be a healthy activity for many reasons. It helps you share your own thoughts in a private way, gives you time and space to yourself, and gives you freedom to let out all that you are thinking. Your journal doesn't at all have to be focused on grief. Instead, just let it be a time to free your mind, write about anything you can think of at the time, or use the list below to spark some ideas.

LIST OF WRITING IDEAS - About Your Loss

- My favorite memory
- What I wish I could say
- My top 10 favorite things about them
- One thing I would change
- How I like to remember them
- Things that stick with me the most
- How I'm feeling right now
- How my loss helped me grow

LIST OF WRITING IDEAS - Other Ideas

- My favorite things
- My biggest strengths
- 3 big goals for myself
- Dear future me
- The most fun that I ever had
- My biggest challenge and how I got through
- My list of unique qualities
- List of biggest pet peeves
- List of things I love

RESPOND: Can you think of more? List at least 5 more things that you could write about in a journal.

© 2017 Pathways 2 Success

How much do you know about the...

Environment

1. What do you call the area that is inhabited by a particular species?
a) Habitat.
b) Environment.
c) Biosphere.
2. What do you call the processing of used materials and their reuse?
a) Recycling.
b) Reusing.
c) Reprocessing.
3. Which layer protects the Earth from UV rays?
a) Oxygen.
b) Nitrogen.
c) Ozone.
4. The process by which the Earth's temperature is increasing is called the ...
a) biothermal effect.
b) greenhouse effect.
c) temperature effect.
5. Which of the following is biodegradable?
a) Plastic.
b) Paper.
c) Glass.
6. What is the term for the complete disappearance of a species?
a) Termination.
b) Disappearance.
c) Extinction.
7. What do you call renewable safe sources of energy?
a) Alternative energies.
b) Bio-energies.
c) Solar energies.
8. Which of these energy sources is renewable?
a) Coal.
b) Natural gas.
c) Wind.
9. What do you call the rain that contains many chemicals and is harmful?
a) Smog.
b) Acid rain.
c) Monsoon.
10. What do you call a substance that pollutes the air, water or soil?
a) Pollutant.
b) Pesticides.
c) Acid.
11. What is the most used renewable energy source in the world?
a) Hydro energy.
b) Solar energy.
c) Wind energy.
12. Which of these animals is not in danger becoming extinct?
a) Panda bears.
b) Polar bears.
c) Grizzly bears.
13. What type of shopping bag is more eco-friendly?
a) Paper.
b) Plastic.
c) Neither.
14. Global warming will cause an increase of ...
a) Heat waves.
b) Hurricanes.
c) Both.
15. Which gas is responsible for global warming?
a) Carbon dioxide.
b) Oxygen.
c) Hydrogen.
16. What are some of the consequences of deforestation?
a) Loss of habitats.
b) Soil erosion.
c) Both.
17. Which of the following is not a fossil fuel?
a) Coal.
b) Wood.
c) Oil.
18. Which of these human activities contributes the most for global warming?
a) Using fossil fuels.
b) Cutting down trees.
c) Riding bicycles.
19. Which of the following can be recycled?
a) Milk cartons.
b) Plastic bottles.
c) Both.
20. Which is the following animals is not yet extinct?
a) Tasmanian tiger.
b) Dodo.
c) Javan rhinoceros.
21. Rainforest land is most often cleared for ...
a) factories.
b) farmland.
c) pasture.

Reversible and irreversible changes live worksheet. Worksheet reversible irreversible changes. Reversible and irreversible changes worksheet with answers.

As the number of shares outstanding is reduced, the stock's earnings-per-share or EPS begin to rise, which can, in turn, help the price of each share rise as well. A company may perform a reverse stock split for several reasons, and, as an investor, it's important to find out exactly what inspired them to do so. If you tune into cable channels that reach older viewers, it's hard to miss the ad pitches for reverse mortgages. Common reverse swap ratios are 1:2, 1:5, 1:10, 1:50, or even 1:100. Photo Courtesy: guvendemir/Stock What happens to leftover shares after a reverse stock split? There are several reasons a company might choose to make such a move, including the following: To Avoid Getting Delisted Major exchanges such as the NYSE and NASDAQ have certain requirements that companies must meet to get and stay listed on their exchanges. The acquired company's shareholders would then have their old shares replaced with shares of equal value in the acquiring company. Lowering the float for Large Investors A reverse split can reduce the total number of shares that a company offers on the market substantially. In this case, the company would simply consolidate the acquired company's shares through a reverse stock split to merge them with their own. Among the pitchmen are older actors Fred Thompson and Robert Wagner, who explain to seniors in reassuring tones how easy it can be to tap home equity to meet their expenses. The song is called Red Barchetta by Rush. Afterwards, head to the kitchen to help your child experiment for themselves! Download Worksheet Complete online A reversible change is a change which can be undone (e.g. freezing water); irreversible changes can't be undone (e.g. burning a log). In these worksheets, students classify changes as reversible or irreversible. After the 1:5 reverse split, you'd own one share of XYZ that was worth \$25. Btw, hmberto is my name on youtube, i didn't steal this video. Generally, a reverse split does not tend to result in fractional shares, as the company will usually do one of two things. This is a common question that investors ask, especially if the number of shares they currently own doesn't make for an even swap ratio. For example, say that you currently own 25 shares of company ABC, which has just announced an impending 1:2 reverse split. Will you be left with 12.5 shares? Our year 6 science worksheets will help support your young scientist as they develop their skills of scientific enquiry. Reverse splits under these circumstances can be a turn-off for potential investors and make current shareholders nervous. But outside the realm of TV ads, the reverse-mortgage industry isn't quite so calm these days. More Positive Reasons for Reverse Stock Splits Photo Courtesy: howtotogo/Stock A reverse stock split isn't always necessarily a bad sign and, depending on the situation, may even be a sound move on the company's behalf. On the other hand, it's generally pretty obvious what they're doing and is considered a self-defeating move by many analysts. Occasionally, they will round an investor's uneven number of shares up to the nearest whole number, which in this example would result in 25 shares becoming 13. More commonly, they'll pay out cash for any leftover share fractions. We have a variety of science worksheets covering topics like interdependence and adaptation, electricity, micro-organisms, forces, and much more. So why would a company even consider it? Much like the value of the shares themselves, dividends are simply consolidated at the reverse split ratio. The company's reasoning should tell you a great deal about whether the reverse split represents a cause for concern or whether it may actually work to the benefit of shareholders. MORE FROM ASKMONEY.COM Report this resource let us know if it violates our terms and conditions. Spark your child's curiosity with our year 6 science worksheets and printables! WORKSHEET PLANS FROM £3.20/MONTH Try all worksheets in one app When you crack an egg and cook it, there's no going back to the way it was before! Teach your child that heating or cooling some substances causes physical changes using this intriguing reversible irreversible changes worksheet. Unfortunately for the company, institutional support is usually a necessary component of major price movement. Photo Courtesy: fizkes/Stock A reverse stock split, also known as a stock consolidation, stock merge, or share rollback, is when a company combines several existing shares into fewer (but higher-priced) shares. It's also adjusting to a changing loan marketplace following the departure of three very large lenders and the introduction of new products. So if you have 5 shares that each paid out a \$.25 dividend before a 1:5 split, your resulting single share would pay out a \$1.25 dividend. If this were the case, you'd end up with 12 shares after the split and receive a payout for the remaining half share. Another common question is, how does a reverse stock split affect dividend payouts? Reverse split ratios can differ and largely depend on the price the company would like to trade. Here are some examples of situations in which a reverse stock split makes sense. When a company acquires or merges with a new company, it's a common move for them to merge the acquired company's shares with their own. A reverse split may be an attempt on the company's part to garner more interest among analysts and major market movers. A Shaky Financial Outlook If a company is anticipating an unflattering earnings report due to financial difficulties, then a reverse stock split can serve to provide a little extra padding. A reverse split also decreases transaction costs for large, institutional investors who tend to buy shares in bulk. On the one hand, a company may succeed in remaining on a major exchange or avoid dropping beneath the threshold at which institutional investors tend to lose interest. It's the opposite of a forward stock split, which divides a single share into multiple, lower-priced shares. A little video I made today since I had nothing better to do. Join us for a breakdown of reverse stock splits, why they happen, and what you need to know as an investor. Photo Courtesy: GaudiLab/Stock When a company announces a reverse stock split, they plan to consolidate their stock into fewer shares that will trade for a higher price. However, a potential problem may arise if this results in more shares than the company's articles of incorporation allow. For instance, if a company announces that they're going to do a 1-for-5 (or 1:5) reverse split, it means that for every five shares you currently own in the company, you'll now own one share or the same combined value. Penny stocks are stocks that are currently trading for less than \$5 and tend to be avoided by large institutional investors. Reasons for Reverse Stock Splits Photo Courtesy: Avalon Studio/Stock Unlike a forward stock split, a reverse stock split is generally perceived as an unflattering indication of how a company is doing. By raising the price of each share, the stock's price has more room to fall without entering into penny stock or delisting territory. Each of the above reasons for performing a reverse stock split comes with a list of pros and cons. Our customer service team will review your report and will be in touch. The industry has been struggling to cope with a rising number of nonperforming loans and foreclosures in the wake of the housing crash. Say, for instance, that you currently own five shares of company XYZ, each of which is worth \$5 apiece. And more changes are looming, with a temporary increase in loan limits tied to the federal stimulus law scheduled to expire this fall. This can be attractive for an investor who is seriously interested in owning a large portion of the company, as it requires them to purchase a smaller number of shares to do so. As you can see, this doesn't actually change the value of your holdings in the company, as the price of each of the original five shares is simply rolled into one. If a company fails to meet these requirements over a certain period of time, they risk being kicked off of the exchange or "delisted." If a company is struggling to maintain these requirements, a reverse stock split may give them the boost they need to remain listed. To Make the Company Appear More Legitimate Even if the company isn't in immediate danger of delisting, it may be trading in or around the penny stock zone.
